

The Indiana DO NOT CALL list is one of the few things the politicians have come up with that I can get behind. If you really want to do the right thing you will change the federal law to a copy of the one that our state has adopted. I am so sick of big business cramming their wants down our throats. I want the law to remain as it is so it can protect me from the harrassment of telemarketers. I certainly will have nothing to do with any bank that wishes to take away my right to privacy.
